

D12-0304 – MATHEW HOPKINS ROAD, HOLTZE – DESIGN AND CONSTRUCTION OF OFFICE AND WORKSHOP FACILITY

SCOPE OF WORKS

NSCON were engaged by the Land Development Corporation to design and construct an office, workshop and hard stand yard for a heavy equipment maintenance provider.

The land area for this build was 8,000m², with the workshop area consisting of 1,600m², as well as additional office space.

The workshop space design was required to accommodate the safe entry and exit of large machinery and vehicles into the workshop area. With special requirements for the workshop to include:

- ✓ a ground service pit,
- ✓ spillage containment and drainage area, and
- ✓ an overhead gantry crane.

Located in the Defence Hub, established to provide support to the Defence industry.
